

# ALERT!

**Governor Murphy has declared a State of Emergency effective 5pm today in response to the impending storm.**

**Our area is predicted to have hazardous weather conditions including heavy rain, high winds, and flash flooding. Therefore we ask that non-emergency travel be restricted. The Borough circle will likely be impacted and should be avoided.**

**We are encouraging residents to avoid unnecessary travel starting mid-afternoon Tuesday. After 5pm, residents should make every effort to stay off the roads. Residents should not attempt to drive on flooded roadways and should never move, or drive around, barricades.**

**The Borough's Emergency Management team and first responders are always prepared to assist in emergency situations, if the need arises.**

**Please be safe and obey all emergency directives. Check the Borough's website and Facebook page for frequent updates.**
